📁 PROFESSIONAL EXPERIENCE

06/2023 – 08/2023
berlin, germany

greentech

greentech training internship

- Led Decarbonizer Task Force, demonstrating strong leadership and organizational skills through **Scrum** methodology.
- Automated Python **web scraping** for data acquisition across five countries, extracting **over 400** job listings per country..
- Conducted thorough **data analysis** to categorize and classify job titles.
- Addressed challenges related to data quality and normalization during codex development.
- Effectively managed project timelines, resources, and deliverables, surpassing stakeholder expectations by completing the codex project 20% ahead of schedule.
- Produced valuable resource benefiting job seekers and employers in the green sector.

🎓 EDUCATION

2019 – 2020

baccalauréat sciences techniques

Lycée Mohamed Boudhina Hammamet

2020 – 2022

cycle preparatoire

2022 – 2023

1ère année cycle ingénieur

ESPRIT

2023 – 2024

2ème année cycle ingénieur

ESPRIT

🧠 SKILLS

Python (TensorFlow)

c++

javascript

node js

django

java

Pytorch

scikit-learn

power BI

codenameone

mysql

sqlite

oracle pl/sql

R

Machine Learning

Deep Learning

Data Analysis

Problem-Solving

Natural Language Processing (NLP)

Computer Vision

Neural Network Architectures

big data

IEEE

AWARDS

| | |
|------|--|
| 2022 | inter class english competition second place in the inter-class English competition |
| 2023 | machine learning hackathon  zindi |
| 2024 | CISolution Hackathon  CISolution 1st place in the CISolution Machine Learning Regression Challenge Hackathon |

CERTIFICATES

- Nvidia Fundamentals of Deep Learning 
- Nvidia Getting Started with Deep Learning 
- Machine Learning with Python (with Honors) 
- Chatbot with Rasa and Python 
- Neural Networks and Deep Learning 
- IBM data science specialization 
- Building Real-Time Video AI Applications 
- Data Analysis with Python 
- Introduction to Transformer-Based Natural Language Processing 
- google Data Analysis with R Programming 
- Disaster Risk Monitoring Using Satellite Imagery
- Python Project for Data Science 
- Getting Started with AI on Jetson Nano 

PROJECTS

| | |
|------|---|
| 2022 | BI machine learning project  <ul style="list-style-type: none">• Collaborated on team for data analytics/predictive modeling at Global Superstore• Utilized SSIS/SSAS for ETL, created OLAP cube for efficient data management• Deployed predictive model using Django on AWS EC2 for scalability• Analyzed data with Python, applied ML algorithms for profit prediction• Visualized insights with Power BI |
| 2023 | deep learning chatbot for Esprit administration <ul style="list-style-type: none">• Collaborated with the administration of my school to design and implement a chatbot using the Rasa framework to answer common student questions related to the school's policies and procedures |
| 2024 | Robotics Project - Simulated Football Match with Computer Vision <ul style="list-style-type: none">• Computer Vision and Image Processing: Developed algorithms using OpenCV for QR code detection, robot localization, and ball tracking.• Real-time Tracking: Employed real-time tracking techniques to monitor and update robot and ball coordinates during the simulation. |
| 2024 | FIKO- AI driving assistant  <ul style="list-style-type: none">• Co-developed "Fiko," a Multimodal AI Driving Assistant for estimating driver fatigue using facial and head positions.• Utilized hybrid learning models to predict fatigue percentage.• Engage alerts based on these predictions, such as sound and visual alerts, and guide the user using GPS to the nearest rest stop for their safety. |
| 2024 | ODDO BHF Securities Chatbot Project <ul style="list-style-type: none">• Developed a financial chatbot for ODDO BHF, a leading French financial services company.• Implemented Retrieval-Augmented Generation (RAG) and fine-tuning techniques.• Utilized Mistral (LLM) for accurate and effective financial interactions.• Enhanced client engagement and operational efficiency. |
